TABLE WELDING MACHINE

DESCRIPTION

This table welder is equipped with a pneumatic pipette. It allows the closing of the PE / PA bags of low and medium thickness by welding with vacuum or injection of gas. The pneumatic cycle is controlled by an electric pedal. Once the various working parameters have been set (vacuum time, cooling time, vacuum, gas), the cycle is performed automatically. Made especially for the packaging of electronic components or high-tech parts.

KEY FEATURES

- Length of weld: 500 mm
- Standard welding width: 5 mm
- Vacuum system: Venturi 85 l/minute
- Voltage and consumption 220 V mono - 1,200 W
- Pneumatic feeding: 6 bar

SIZE

84 x 48 x 33 [cm]
2.75 x 1.57 x 1.08 [ft]

WEIGHT

30 [kg]
66.1 [lbs]

APPLICABILITY

All aircrafts.
