## HOT AIR GUN

### DESCRIPTION

HG 2620 electronically adjustable hot air gun with 2300 W brush motor. The joystick adjusts the temperature of the ceramic heater continuously in increments of 10°C, from 50 to 700°C (122 to 1292°F). Air is also continuously adjustable from 150 to 500 l / min. Equipped with an LCD screen and a residual heat indicator. The brushless motor is designed for 10,000 hours or more. The residual heat indicator light allows safe operation of the appliance and the built-in thermal fuse prevents overheating. The built-in dust filter, the ergonomic shape of the flexible sheath handle and the magnesium protective tube ensure safe working. Included: round nozzle (32 mm / 1.26"), curved adaptor, power supply cable (3 m).

### KEY FEATURES

- LCD display
- 1650-watt brushless motor
- Improved running time of 10,000 hours
- Variable temperature adjustment in 10°C steps by joystick
- Ergonomic handle with soft inlay and magnesium guard sleeve for working both safely and comfortably
- The integrated fine dust filter protects internal component in dusty environments
- The outlet nozzle is suitable for fitting screw-on professional nozzles
- The power cord can be easily changed
- LOC function can be used to lock all settings on the tool
- Integrated thermal cut-out prevents overheating

### SIZE

35.8 x 9.1 x 9.5 (cm)  
1.17 x 0.29 x 0.31 (ft)

Case: 50 x 35.5 x 4.5 (cm)  
1.64 x 1.16 x 0.14 (ft)

### WEIGHT

0.84 (kg)  
1.8 (lbs)

### APPLICABILITY

All aircrafts
